

1. Amendments to the Claims:

- 1.(Original) An item holder comprising:
  - a piece of material constructed in the shape of a face;
  - a denture tray attached near a mouth located on the piece of material wherein a denture may be placed in the tray to be stored;
  - an eyeglass tray attached near the eyes located on the piece of material wherein a set of eyeglasses may be placed in the tray to be stored; and
  - a hearing aid tray attached near an ear located on the piece of material wherein a hearing aid may be placed on the tray to be stored.
- 2.(Original) The item holder of Claim 1 further comprises a second hearing air tray attached near a second ear located on the piece of material wherein a second hearing aid may be placed on the tray to be stored.
- 3.(Original) An item holder comprising:
  - a piece of material having a predetermined shape;
  - a denture tray attached near a first location on the piece of material wherein a denture may be placed in the tray to be stored;
  - an eyeglass tray attached near a second location on the piece of material wherein a set of eyeglasses may be placed in the tray to be stored; and
  - a hearing aid tray attached near a third location on the piece of material wherein a hearing aid may be placed on the tray to be stored.
- 4.(Original) The item holder of Claim 3 further comprising a second hearing aid tray attached near a fourth location on the piece of material wherein a second hearing aid may be placed on the tray to be stored.
- 5.(Original) An item holder, comprising:
  - a first compartment for storing a set of dentures;
  - a second compartment for storing a set of eyeglasses;
  - a third compartment for storing one or more hearing aids, and
  - wherein the first, second and third compartments each have a depiction of the item to be stored in the particular compartment to help people remember to store the item in the compartment and remember where the particular item is stored.
- 6.(New) An item holder, comprising:

a first compartment for storing a set of dentures, the first compartment being shaped to fit a set of dentures so that a set of dentures will fit into the first compartment;

a second compartment for storing a set of eyeglasses, the second compartment being shaped to fit a set of eyeglasses so that a set of eyeglasses will fit into the second compartment;

a third compartment for storing one or more hearing aids, the third compartment being shaped to fit the one or more hearing aids;

a lid that is closeable over the first, second and third compartments wherein the lid has a depiction of the item to be stored in the particular compartment, the depiction for a particular compartment being on a portion of the lid above the particular compartment, the depictions helping people remember to store the item in each compartment and remember where the particular item is stored.
